FOREWORD

This bibliography presents military periodical articles written on the subject of Imperial or Soviet Russia at war. Emphasis in this number is on the tactical evolution of the armed forces. Although coverage of their many heavy-handed operations is omitted for the period, 1945-1979, this is largely due to their indirect involvement. Such an in-depth analysis is beyond the scope of this number.

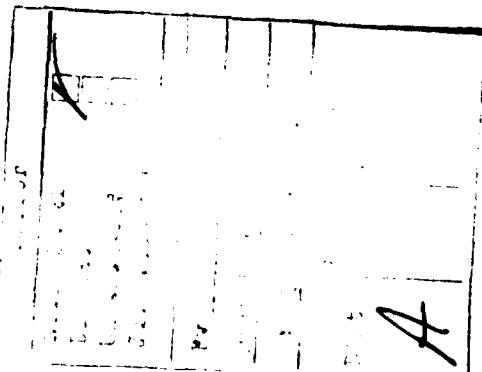

This number is arranged in two parts. Part one lists military periodicals by an arbitrarily devised acronym. Part two contains the periodical article. Selection has been made from various journals owned by the Morris Swett Library. Inclusion of an item, or omission, does not imply USAFAS indorsement or sanction of the compiler's point-of-view.
